

LEONIDAS PELIGRINELI

Senior Frontend Engineer

Piracicaba, São Paulo | +5511985545299 | l.peligrineli@gmail.com | linkedin.com/in/leopeli/ | www.leopeli.dev.br

Profile

Senior Frontend Engineer with 8+ years of experience building scalable, high-performance web applications. Specialized in React, TypeScript and modern frontend architecture, with hands-on experience in Next.js, Vite, TanStack Query, design systems, data visualization, automated testing and performance optimization. Technical leader with experience defining application architecture, establishing engineering standards, mentoring developers and driving scalable frontend solutions.

EXPERIENCE

Senior Frontend Engineer, Ewave do Brasil

Jun 2025 - Present

São Paulo

- Defined and standardized the base architecture for Auren's React projects by creating and documenting a reusable boilerplate, establishing structure, configuration and development standards that accelerated onboarding and increased consistency across applications.
- Contributed to the architecture and development of an analytics platform for the energy sector using React, TypeScript, Vite, Tailwind CSS and TanStack Query. Structured the solution with MVVM, clear separation of responsibilities, and patterns focused on scalability, maintainability and product evolution.
- Served as a frontend technical reference, supporting architectural decisions, standards definition, solution reviews, onboarding and developer mentoring, improving code quality and technical consistency across projects.

Senior Frontend Engineer, INEO

Mar 2024 - Jun 2025

Brasília

- Worked on the development and evolution of a digital platform for notary offices, designing frontend solutions that simplified debt and fee payments, reduced manual steps, improved operational efficiency and delivered a smoother user experience.
- Defined a hybrid architecture using Next.js server-side rendering for notary-office modules and Vite for end-user modules, adapting the infrastructure to the needs of each flow.
- Implemented TanStack Query and caching strategies to reduce redundant requests, improve application responsiveness and lower operational load.

Senior Frontend Engineer, Zappts

Apr 2023 - Mar 2024

São José dos Campos

- Refactored GetNet's card-machine sales application, modernizing the frontend codebase and leading the upgrade to Angular 14, improving architecture organization, maintainability, stability and user experience.
- Acted as a technical reference for internal teams using React, supporting architectural decisions, implementation reviews, best-practice definition and complex problem solving.
- Planned and led knowledge-sharing initiatives, including technical content, internal talks and mentoring for junior developers, helping spread engineering best practices.

Frontend Engineer, Framework Digital

Aug 2021 - Jan 2023

Belo Horizonte

- Developed frontend solutions for brands including Localiza Seminovos, Drogaria Araujo, Woba and Reserva, using React, JavaScript, HTML and CSS within the VTEX CMS and VTEX IO ecosystem, with a focus on performance, maintenance and user experience.
- Planned and executed Woba's frontend modernization during the platform rebranding, migrating the application to a React-based architecture and aligning the new implementation with the product's visual and technical standards.

- Mentored junior developers and interns through technical guidance, code reviews and engineering best practices, improving consistency across the team's solutions.

Frontend Developer, Comunique-se S/A
São Paulo

Apr 2020 - Jul 2021

Worked on the frontend development of the Influency.me product using Angular 9, RxJS, PrimeNG and Sass, contributing to the evolution of the interface and user experience. Also participated in UX Design activities, creating interface prototypes and conducting usability analyses to improve interaction and product flows.

Frontend Developer, WF (a serviço do Bradesco)
Osasco

May 2018 - Apr 2020

Developed landing pages, websites and promotional microsites using JavaScript, HTML, CSS and Bootstrap, with a focus on responsiveness, performance and user experience. Also worked on third-party solution integrations, frontend service integration, portal maintenance and Git-based version control and team collaboration.

Frontend Developer, Track&Field
São Paulo

jul 2017 - 2018

Developed landing pages, websites and promotional microsites using JavaScript, HTML, CSS and Bootstrap to deliver strong user experiences. Participated in the e-commerce migration from Linx to VTEX, developing product pages and promotional storefronts.

Product Analyst, Comunique-se S/A
São Paulo

Apr 2013 - Jun 2017

Joined Comunique-se as a Support Analyst and progressed to Product Analyst, taking on responsibilities in solution development, implementation and evolution. Also contributed to the development and launch of Sua TV, working across different stages of the product lifecycle.

Education

Instituto Brasileiro de Tecnologia Avançada - IBTA
Bacharelado, Ciência da Computação

2015 to 2019

Languages

English: Full professional proficiency, Portuguese: Nativo
